1 The Basics

1.1 Overview

Thank you for choosing the QUO MOTIV smart watch. After reading this guide you will be able to fully master the use of your watch and appreciate all its functions and ease of use.

Not only does the smartwatch provide you with basic call functions such as call Register, but also with many practical functions and services, to improve the time you spend working and playing.

The availability of some services and features described in this manual depends on the network and your subscription. Therefore, some menu items may not be available in your smartwatch. The shortcuts to menus and features may also vary from watch to watch.

Our company reserves the right to revise this manual content without prior notice.

1.2 Safety warnings and notices

Before using your mobile phone and smartwatch, read and understand

the following notices carefully to ensure you will use it safely and properly.

1.3 General attention

- Some features may not work (or work partially) in IOS or Android, however, some of them will be updated in the near future **IMPORTANT**
- To avoid your smartwatch malfunctioning, or catching fire, please do not violently impact, jolt or throw your smartwatch.
- Please do not place the smartwatch in a microwave oven or high-pressure equipment. Otherwise it could lead to unexpected accidents such as damage to the circuitry or fire hazard.
- Please do not use your smartwatch near flammable or explosive gases, otherwise it could cause malfunction of your phone or fire hazard.
- Please do not subject your smartwatch to high temperatures, high humidity or dusty places; otherwise this may lead to the malfunction of your smartwatch.
- To avoid your smartwatch falling and malfunctioning or being damaged, please do not place it on uneven or unstable surfaces.

1.4 Notices when using your QUO MOTIV

- Please do not subject the LCD to impact or use the screen to strike things, as this will damage the LCD board and cause leakage of the liquid crystal. There is a risk of blindness if the liquid crystal substance gets into the eyes. If this occurs rinse eyes immediately with clear water (under no circumstances rub your eyes) and go immediately to a hospital for treatment.
- Do not disassemble or modify your smartwatch, as it will lead to damage to the smartwatch such as battery leakage or circuitry failure.
- Please do not use needles, pen tips, or other sharp objects on the key pad as this may damage the smartwatch or cause it to malfunction.
- The battery has a limited service life. The remaining life gets shorter as the times of charging increase. If the battery becomes feeble even after

the charging, this indicates the service life is over and you have to use a new battery.

- When installing the battery, do not use force or pressure, as this will cause the battery to leak, overheat, crack and catch fire.
- If the battery overheats, changes color, or becomes distorted during use, charging, or storage, please stop using and replace it with a new battery.
- Please do not continuously charge for more than 24 hours. **IMPORTANT**

1.5 Charging your QUO MOTIV

- Connect the connector of charger to the smartwatch. The battery level indicator flashes on the screen. Even if the smartwatch has been turned off, the charging image still appears, indicating that the battery is being charged. If the smartwatch is overused when the current is insufficient, it may take longer time for the charging indicator to appear on the screen after the charging begins.
- When the battery level indicator does not flash and indicates the battery is full, this indicates the charging has been completed. If the smartwatch is off during charging, the charging being completed image also appears on the screen. The charging process often takes 3 to 4 hours. During the charging, the battery, smartwatch and charger gets warm, this is a normal phenomenon.
- Upon the completion of charging, disconnect the charger from AC/USB power socket, and from the smartwatch.

Notes:

- During charging, the smartwatch must be placed in well-ventilated environment of $+5^{\circ}\text{C} \sim +40^{\circ}\text{C}$. Always use the charger supplied by your smartwatch manufacturer. Using an unauthorized charger might cause danger and invalidate the authorization and warranty clauses for your smartwatch.
- Make sure the battery has been installed before charging. It is best not to remove the battery while charging.

- Upon completion of charging, disconnect the charger from your smartwatch and the power supply.

If you have not disconnected the charger from your smartwatch and the power supply, the charger will continue to charge the battery after about 5 to 8 hours when the battery level decreases substantially. We advise you not to do like this, as it lowers your phone performance and shortens your smartwatch life.

2 Technical Parameters

Model:

QSW-508-BKSL (Silver)

QSW-508-BKGD (Gold)

Dimension (L×W×D): 69 x 38 x 12.5mm

Weight: 0,075 Kg

Material: Stainless brushed steel + plastic

Main Display Size: 1.6 inch

Main Display Resolution: 240 x 240

Chipset: MT6572 dual-core 1GHz CPU

Internal Storage: eMMC memory (4GB ROM + 512MB RAM)

WIFI/Bluetooth: 2.4GHz 802.11 b/g/n - Bluetooth 4.0

Camera: 5MP AF

Lithium-ion battery Capacity: 350mAh

3. Getting Started

3.1 Equipment parts diagram

- Design and specifications are subject to change without notice.

Wearing the equipment

1. Loosen the buckle.

- Don't hurt your nails when loosen the belt buckle.
- Don't bend the strap excessively. It may damage the equipment.

2. Open the buckle and adjust wrist band to your size.

3. To wear the equipment, put it back on your wrist and press buckle until a click is heard.

3.2 Key explanations

Button	Explanations
Power Key	<ul style="list-style-type: none">• Hold down this key to turn your smartwatch off and on.• Press this key in other applications to return to the clock screen.• Generally, press this key to lock the mobile phone.• Shut down the smartwatch by pressing this key for about 10 seconds or restart the smartwatch by pressing this key for about 15 seconds.

3.3 Turning your smartwatch ON and OFF

To turn ON the phone, hold down the POWER key on the right; to turn OFF the phone, hold down the POWER key and select Power Off.

3.4 Using the touch screen

Your smartwatch provides many touch keys in the Main screen.

Meanwhile please follow the instructions:

- Do not touch the screen with wet hands.

- Do not touch the screen with great forces.
- Do not touch the screen with metallic or conductive objects.

3.5 Basic functions

The home screen is the beginning of all applications. There are clock shortcuts, applications, and others. Click on the screen to start the application. The main screen has multiple panels. To view other panels, swipe left or right.

Clock: Long press the clock screen until there is a shock, and then slide to the right to select your desired clock interface.

View Recent Tasks: Double-click on the clock screen to see the recent active tasks.

Return to the previous screen: Slide down from the top of the screen to return to the previous screen interface.

Quick access to the camera: Slide down in the clock screen from the top of the screen to enter the camera.

Quick access to dialing: Slide up in the clock screen from the bottom of the screen to enter dialer.

3.6 Connecting to the mobile devices

Connect your smartwatch to another mobile device, so that you can use the various functions on the mobile devices. To connect the smartwatch to another mobile device, you can turn on Bluetooth to connect to mobile devices with Watch Manager. then in your QUO MOTIV go to “Connect” app. Send and open the app Watch Manager to your mobile device, then follow display instructions.

The Watch Manager is installed on a mobile device, and then turn on Bluetooth of both QUO MOTIV and mobile device . Once you start Watch Manager, the mobile device will scan QUO MOTIV and then connect it. After connecting to a mobile device, you can use part of the application on a mobile device. (Note: Please contact your dealer to get Watch Manager.)

To connect your IOS devices with MOTIV QUO please go to our website www.quomobility.com (Go to "support" then section "Tutorials"), there you will find the steps to connect with your QUO MOTIV .

3.7 Locking & Unlocking your smartwatch

When not in use, please lock the device to avoid unnecessary operations. Press the power button on the screen to turn off the screen and make the device go into lockdown mode If the device is not used within a specified period of time, it will be automatically locked. Press the power button to unlock the device. You can also set QUO MOTIV protection. If you have selected this function, you must draw unlocking pattern each time you turn on your QUO MOTIV, to unlock the QUO MOTIV and then make or answer calls. You may clear the unlocking pattern (see "Safety settings"). In this case, the unauthorized use of your QUO MOTIV cannot be protected.

Turn ON locking in QUO MOTIV Settings

Section Privacy Lock

Set the unlock style (without and pattern unlock)

3.8 Notifications

Once the QUO MOTIV is connected to the mobile device and the mobile device is targeted, you can receive notifications, such as missed calls or new messages.

Upon receipt of notification, click on the icon in the upper right corner of the screen to view the details.

To view the notification history, slide to the application on the home screen, and then click Apps /Notifications to view the details.
